## Professional Summary

I'm a frontend developer who loves building web and mobile apps that actually work for people. I focus on React Native and React.js and enjoy creating apps that are reliable, easy to use, and can grow with a business. I've built full mobile and web applications on my own for companies like Cushy Access and TechSolutins, including admin dashboards, vendor apps, and logistics platforms. I pay close attention to user experience, connecting apps to APIs, and making sure everything runs smoothly and efficiently.

## Skills

Frontend Technologies: React Native, React.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, NativeWind
Version Control & Collaboration: Git, GitHub
Build Tools: Babel, NPM, Yarn
APIs & Integration: RESTful APIs, Axios, Firebase, Paystack
UI/UX Design: Figma, Adobe XD, Responsive Design, Mobile-first Design, Wireframing
Testing: Jest, React Testing Library, Cypress

## Professional Experience

### Frontend / Mobile Developer
Cushy Access – Nigeria | November 2024 – Present

- Built the full mobile application from scratch for both users and vendors using React Native.
- Implemented features for ordering groceries, food items, logistics, and doctor consultations.
- Developed the vendor app with onboarding, product management, order tracking, and payment features.
- Integrated REST APIs for authentication, products, orders, vendors, and logistics.
- Implemented state management, error handling, and reusable components for maintainability.
- Successfully deployed and maintained apps on Apple App Store and Google Play Store.
- Focused on performance optimization, responsive UI, and seamless user experience across devices.

### Frontend Developer
TechSolutins – Nigeria | June 2025

- Built the company landing page using Next.js, incorporating responsive layouts and React animations.
- Collaborated with stakeholders to translate design mockups into production-ready web pages.

### Full-Stack / Frontend Developer
DaasArt – Nigeria | August 2025

- Developed a full-stack web platform for showcasing crack glass art, enabling users to place custom orders and make secure payments via Paystack.
- Designed and implemented responsive UI and integrated backend APIs for orders and payments.

### Full-Stack / Frontend Developer
Verify Point(Under Techsolutins) – Nigeria | January 2023 – May 2023

- Built a background verification platform, handling criminal, education, employment, and NIN checks.
- Developed admin dashboards, logistic driver apps, and web portals to manage verification processes.
- Integrated APIs for data fetching, verification processes, and real-time updates.

### Frontend Developer
TadExpress – USA | September 2025 – Present

- Built a logistics platform with a web app for verified drivers to accept pickups, track deliveries via Google Maps, and manage package drop-offs.
- Developed the sender-side mobile app and admin dashboard for tracking deliveries and managing orders.

## Education

Bachelor of Science in Computer Science
Federal University of Technology Minna, Nigeria
Currently in 3rd Year | Expected Graduation: 2028

## Certifications

- Responsive Web Design Certification – Paritie, 2023

## Languages

Yoruba – Native

English – Fluent

Hausa – Fluent
